Genetic Technician in Cytogenetics 80% - 100% Fixed-term (12-month) contract

Reference n.: 4450

Main duties

- Reception of patient samples sent to the laboratory for testing, mostly blood and bone marrow, following sample handling procedures and local safety directives;
- Preparation of clinical samples for cytogenetic analysis (G-banding, FISH and microarray), including cell culture;
- Routine sample analysis by G-banded karyotyping, FISH and microarray;
- Availability for Saturday morning and public holiday shifts and occasional evening work on a rota basis;
- Participation in any relevant technical processes to support other technical staff and ensure cover in their absence.

Your profile

- Fully trained Biomedical Technician/Technologist (in Switzerland: BMA HF / TAB diplômé-e ES / TAB dipl. SSS) or equivalent qualification recognised in Switzerland;
- Experience in Medical Laboratory Genetics, ideally in Cytogenetics;
- Ability to work both independently and as part of a team;
- Ability to perform standard highly accurate technical processes with great attention to detail;
- Ability to speak Italian or willingness to learn;
- Knowledge of technical / scientific English is an advantage.

We offer

- Fixed-term (12-month) contract
- Working pattern: 80-100%
- Starting date: 01.05.2025 or by agreement
- Five weeks' holiday
- A friendly, calm and welcoming work environment (Italian, English and French spoken)

Start date: 01.05.2025 or by agreement

We look forward to receiving your application quoting the reference number by e-mail to sandra.steffen@medisyn.ch
Only profiles with the required characteristics will be considered
